

NCD Kits

Non Communicable Disease Kit

Delivering the difference

together for global health

WHO has developed a consolidated set of products for use in cases of emergencies, when regular supply is disrupted. It is a reliable, standardized, affordable and quickly available resource to meet the initial primary health needs.

The prevalence of NCD's is increasing worldwide, also in emergency & crisis prone areas. The "well known" IEHK composition does not cover products to manage the most commonly encountered NCDs in primary health care. In the NCD kit products needed for the management of hypertension and cardiac conditions, diabetes and endocrine conditions, chronic respiratory diseases, and mental health and neurological conditions are included.

The basic NCD kit is intended for outpatient care and can be used in mobile clinics and primary health care units. These products are packed in a kit, a pre-defined set of products, always in the same sequence and packing. The kit contains oral medicines, basic

diagnostic equipment, renewables and additional products needing cold chain, such as insulin, accompanied with treatment guidelines.

NCD kit - medicines

Hypertension	Diabetes	Respiratory	Mental
Acetylsalicylic acid 100mg, blister 10x10	Glibenclamide 5mg, blister 50x10	Beclomethasone inhaler 250mcg, 200 doses	Carbamazepine 100mg, blister 3x10
Amlodipine 5mg, blister 10x10	Metformin 500mg, blister 50x10	Prednisolone 5mg, blister 10x10	Fluoxetine 20mg, blister 10x10
Bisoprolol 5mg, blister 10x10	Levothyroxine 100mcg, blister 10x10	Salbutamol inhaler 100mcg, 200 doses	Risperidone 2mg, blister 10x10
